Texts

Morgagni's complete collected works were published in his lifetime as *Jo. Baptistae Morgagni Opera Omnia in Quinque Tomos Divisa* 1762-1765 in 5 volumes by the Typographia Remondiniana at Venice. I prefer to cite by this edition out of convenience, since L. Premuda's "Versuch einer Bibliographie" (1967) notes that the Remondiniana edition reprints the *editio princeps* without changes. (The pagination of the 1761 *editio princeps* of the *De Sedibus et Causis Morborum* is the same in the 1764-1765 reprint in vols. 3-4 of the *Opera Omnia ... Divisa*; and consequently reference to the *Opera Omnia ... Divisa* edition will cause no confusion.) Volumes 2 and 5 of the *Opera Omnia ... Divisa* were published in three parts, paginated separately, with distinct publication dates. In the following table I have organized Morgagni's works by reference to this edition, then the first edition, then other editions published during Morgagni's life, then translations available.
